THE COLLEGE COMMITTEE.

The great loss which the College Committee has sustained by the death of its Vice-Chairman, Lord Meston, is referred to elsewhere (page 36).

The committee are happy to report that Sir Charles Bressey, C.B., the distinguished engineer, whose scheme for the Post-War planning of London, more especially in regard to roads, has been the subject of much general interest, saw his way to accept an invitation to join the committee in July 1942. His advice on technical matters is of special value.

The committee also welcome Sir Thomas Lewis, Fellow of the College and Director of Clinical Research at University College Hospital, who joined them as from June 1943. His appointment provides a valuable means of strengthening still further the ties which bind the College and the Hospital.

Mr. D. Orson Wood succeeded Mr. T. L. Wren as the non-professorial nominee of the Professorial Board on the College Committee as from 1st March, 1943.

STAFF AND STUDENTS.

The fifth session in evacuation, 1943–44, opened in what may be termed the established temporary conditions, and during the past twelve months there has been no change in the general arrangements for carrying on the teaching work of the College. These are shown in the table given on page 18. The thanks of the College Committee are again recorded to the Authorities of those Colleges which are continuing to act as hosts to our staff and students, often, no doubt, at considerable inconvenience to themselves. The ties which have thus been formed between University College, London, and the various receiving Colleges will, the Committee venture to hope, outlast the War and prove of mutual advantage in the years to come, when normal conditions have been restored.

Meantime, two steps have been taken to bring Gower Street back into academic activity, albeit in a small way. The Department of Phonetics, to meet an expected demand which has since been realised, has reopened in temporary premises in Foster Court, where Professor Daniel Jones and the available members of his staff have been working since the beginning of the current session. Similarly, a course in Town Planning is being conducted by Professor Patrick Abercrombie in the Atelier of the School of Architecture for certain of the Fifth-year Architecture students. Thus, for the first time since 1940, London reappears in the table of students. Its activity in the matter of Public Lectures is referred to later in this Report.

The distribution of courses and students in 1943–44, with the figures of 1942–43 for comparison, is as follows :—

	Science (Chemistry, Postgraduate)	1 (—)	— (—)
		415 (419)	487 (439)
	Total number of students	902 (858)	

Of the above students, 25 (56) are postgraduate, 680 (677) are preparing for first degrees, 115 (94) for diplomas, 5 (10) for Architecture certificates, and 77 (21) are taking other courses in Arts, Architecture or Fine Art.

It will be seen that in the total number of students enrolled for this session there is an apparent increase of 44 on the figure of 1942–43. In order, however, to arrive at a true estimate of the position, the number of part-time occasional students working in London, and appearing in the table for the first time, should not be taken into consideration, the comparison being made only between the full-time regular students working outside London. If this be done, the result is a decrease, 828 this session against the 858 of 1942–43. This decline in numbers is no greater than was to be expected in the fifth war-time session, with the call-up of young men and women of the student age in full operation. Actually, there have been increases which in the circumstances could not have been anticipated. For example, in the Faculty of Arts at Bangor there are 74 women compared with 49 last session. On the other hand, the number of men taking courses at Aberystwyth has dropped from 45 to 21 in the Faculty of Arts and from 70 to 47 in the Faculty of Science, the latter decline being largely accounted for by the disappearance of State Bursaries in Chemistry. The Bangor numbers in Science, which have kept up, still include State Bursars in Mathematics and Physics. There are also State Bursars in Engineering at Swansea, where there has been a large entry of freshmen, and the total number has risen from 58 to 74, including 3 women. Medical Sciences not only retains its numbers but has had to refuse many applicants, more especially women, owing to limitation of accommodation and lack of hospital facilities. The whole question of further provision in London for the medical education of women is under consideration at the present time, and the Provost and Professor Winton, Dean of the College Faculty, were appointed the representatives of the College Committee to give evidence before a special Committee of the Senate.

The Slade School at Oxford and the School of Architecture at Cambridge have had varying fortunes, the former showing an increase of 7 and the latter a decrease of 11.

The encouraging number of postgraduate and research students of last session has not been maintained. Having regard to present difficulties, the decline was not unexpected.

Within the limits of a war-time Report, it is only possible to give a very brief general summary of student activities during the past twelve months, based on the rather meagre information available. Another student generation, whose period of University life has in some Faculties been shortened from three years to two, has begun and ended away from Gower Street. The effort to maintain a sense of corporate unity and to strengthen the community of

interest which binds the scattered sections one to another has been carried on gallantly by the students themselves, and they have continued to display a remarkable allegiance to traditions and customs which circumstances have prevented them from experiencing in normal operation. The two Union Societies, acting through local representatives, and the Inter-Union Standing Committee, have played a leading part in fostering this allegiance, and the College as a whole is greatly indebted to those public-spirited students who have devoted, and are continuing to devote, so much of their time and energy to this end. Among these is included the editorial board of *New Phineas*, the College magazine, which, term by term, performs an invaluable function in keeping the centres in touch with each other's doings and in acting as a general medium for disseminating College news.

The committees of the Union Society and the Women's Union Society and the Inter-Union Standing Committee have come together at vacation meetings in Gower Street and have also enjoyed overnight hospitality at the temporary home of Medical Sciences at Leatherhead. These opportunities for the general discussion, by a representative body, of present and future problems of student life from within have not only provided the means of crystallising student opinion, but, as a result, have been helpful to the College Authorities in gaining insight into the student point of view, more especially in the matter of post-war reconstruction.

The Union Society, founded on 2nd June, 1893, celebrated its fiftieth anniversary by a dance at the Royal Hotel, Woburn Place, on 17th July, 1943. Had conditions been different, such a Jubilee would have received more notice, for the Union Society did great service as custodian of student traditions, prime mover in the development of social and athletic life, and promoter of a corporate spirit at a time when such were badly needed. The list of its officers recalls memories of great men in the history of the College, among them Edward Sharpey-Schafer, first President, Gregory Foster, H. J. Harris and F. W. Goodbody, whose names will always be held in veneration by those who enjoy the inheritance of their labours to place student life on a right basis. That " Eumo ", the beloved Honorary Treasurer, guide, philosopher and friend, should not have lived to see the Jubilee was a matter of universal regret. It had been a project near to his heart that the history of the first fifty years should be written to commemorate the Jubilee, and shortly before his death, in December 1942, he had begun to collect the necessary material. The Union Society Committee have fittingly decided that a bequest of £100 received by the Society under his Will shall form the nucleus of a " Eumo Memorial Publication Fund " with a view to publishing such a history, to be dedicated to him, after the War. Much could be written regarding the growth and activities of the Union Society did space permit, but

the College Committee must content themselves with expressing their keen appreciation of all that those activities have meant to the life of the community and their sincere hope that during the second fifty years of its existence the Society will go on from strength to strength, freed from the vicissitudes of fortune against which it has had to struggle in recent years, but which, the Committee are glad to note, have in nowise diminished its spirit of enterprise and service.

A modified form of Foundation Week was again faithfully observed in the larger centres in 1943. At Aberystwyth, Dr. Robin Flower accepted the invitation to deliver the Foundation Address, choosing as his subject " The English Tradition of Research ". He was, unfortunately, unable to complete the reading of it, owing to temporary indisposition, but the Provost, who made a round of visits to join in the various celebrations, continued on his behalf, so that the occasion did not suffer unduly. There was also the customary dance, concert, sing-song and debate with invited representatives of King's College. At Bangor, the Address was given by Professor G. W. Keeton on " Looking ahead ". In addition to the dance, concert and debate, in which members of University College of North Wales participated, there were two lively performances of " Housemaster " (Ian Hay), arranged by the Dramatic Society. This production was later taken to an R.A.F. camp in the neighbourhood, where it had a warm reception. At Swansea, Professor Norman Baynes, the fame of whose 1942 Address at Bangor had travelled thither, was Foundation Orator. Professor H. Levy gave the address at Leatherhead.

There is ample evidence from the various Society reports that the students are taking full advantage of the special opportunities afforded by their present surroundings for outdoor games and pursuits, and that there is much friendly competition and co-operation between the host and guest Colleges. In addition to sharing in normal war-time duties, such as fire-watching, Home Guard exercises and the like, some special pieces of service have been undertaken. Thus the medical students at Leatherhead shared in the local effort on behalf of a hospital for Stalingrad, and the Engineers worked strenuously in factories during the Long Vacation.

The Slade School at Oxford is obviously enjoying to the full the many benefits gained by working with the Ruskin School at the Ashmolean Museum. Outdoor sketching has flourished in such surroundings, and the social and athletic life has been vigorous. The Slade Society continues to do good service in maintaining corporate enterprise.

At Cambridge there has been a deepening of " U.C.L. consciousness ", resulting in the formation of a U.C.L. Cambridge Society. This has had the very desirable result of bringing together in hours

of recreation the members of what had hitherto been the separated units of Architecture, Laws and Political Economy. The weekly meetings have been well attended and various social events have been successfully arranged. At the same time, contact with the host Colleges and fellow students of other institutions has in nowise been weakened. The pale blue and royal purple of U.C.L. is still seen on the cricket fields playing for the London School of Economics, and U.C.L. students have rowed for St. Catharine's College.

While there is thus a satisfactory record of life in evacuation, the strong desire for a reuniting of all the Faculties and a return to London remains unabated. In support of that feeling, and encouraged by the great success of the London Reunion held for the first time in January 1943, the Inter-Union Standing Committee arranged a similar gathering on New Year's Day, 1944. The project expanded this year so as to embrace not only staff and students of the present day but also members of the Old Students' Association. The result was that many who had been cut off for several years from any contact with their old College gladly availed themselves of the opportunity of forgathering with friends of former days. A hall of the Royal Hotel, Woburn Place, afforded a commodious meeting-place for a gathering of some 550 past and present students, with a fair sprinkling of staff. There was a lively interchange of greetings and reminiscences against the jazz music of the dance band. To the very great regret of all, the Provost was prevented by illness from being present. In the one short speech of the afternoon, the Chairman of the Inter-Union Standing Committee, Mr. L. F. Levy, voiced that regret before asking Mrs. Pye, whose presence added greatly to the pleasure of the occasion, to read a letter expressing the Provost's own disappointment and good wishes. This was received with a hearty rendering of the College cry. Miss Joan Rosenthal, President of the Women's Union Society, had been mainly responsible for the arrangements, and earned the cordial thanks of all who participated in such a genial opening to the New Year. During the week-end, parties of evacuated students who had come to London for the Reunion were taken around portions of the College site and buildings by Professor Jeffery, the Secretary and others.

The Old Students' Association, whose social activities have perforce been suspended during the War, has in more ways than one shown signs of reanimation during the past twelve months. A News Letter, containing a message from the President, Dr. Paul Haas, and a résumé of recent happenings of general College interest, has been circulated by Dr. F. C. Harris, who continues his labours as Honorary Secretary. With a view to safeguarding the future, sectional representatives have been charged with the task of bringing the claims of the Association before students finishing their courses in evacuation. The response has in most cases been very gratifying

and many new members have been enrolled. Students who have been debarred from sharing in the amenities of London in their undergraduate days will thus retain their membership of the community when more normal conditions are restored. A meeting of the sectional representatives was held in London during the Christmas Vacation.

THE ACADEMIC STAFF.

During the period under review there has been only one change in the arrangements whereby certain members of the academic staff are aiding the administration of the College by guiding its activities in evacuation. Professor Sisson has succeeded Professor Butler, whose retirement is referred to on page 24, as Pro-Provost at Aberystwyth. The following is a list of the Pro-Provosts at the centres :—

Aberystwyth	Professor C. J. Sisson.
Bangor	Professor G. B. Jeffery.
Swansea	Professor R. O. Kapp.
Leatherhead	Professor F. R. Winton.
Cambridge	Professor G. W. Keeton.
Oxford	Professor Randolph Schwabe.

In the case of the departments where the heads are absent on War Service, or for any other reason, other members of the staff have been appointed as acting-heads. The following are acting in that capacity during the Session 1943–44 :—

Faculty of Arts :

Italian	Professor B. Woledge.
Latin	Professor M. T. Smiley.
Political Economy	Dr. P. N. Rosenstein-Rodan.

Faculty of Science :

Chemistry (Bangor section)..	Dr. O. L. Brady.
Physics	Mr. D. Orson Wood.
Geology	Dr. L. J. Chubb.

Faculty of Medical Sciences :

Anatomy	Dr. Una Fielding.
Embryology and Histology..	Mr. K. C. Richardson.
Physiology	Dr. W. H. Newton.
Biochemistry	Dr. L. Margaret Kerly.

Faculty of Engineering :

Mechanical Engineering	Mr. B. J. Lloyd-Evans.

Mr. Orson Wood, Senior Tutor, and Dr. L. W. Tancock, Assistant Tutor to Arts Students, at Bangor ; Miss E. Goodyear, Tutor to Women Students, Dr. J. F. Lockwood, Tutor to Arts Students, and Mr. H. Terrey, Assistant Tutor to Science Students, at

Aberystwyth ; Dr. D. H. Smyth, who has succeeded Dr. Newton as Sub-Dean, and Mr. K. C. Richardson, House Tutor, at Leatherhead ; Mr. L. Stuart Stanley, Tutor to Architecture Students at Cambridge ; and Mr. R. Nuttall-Smith at the Slade School at Oxford, are all taking a valuable share in securing the smooth running of the administrative side. Without their help the problems of evacuation would be much more acute.

It is not possible within the limits of a wartime Report to note all the changes in the personnel of the academic staff, but there are certain outstanding matters which must be noted.

At the close of 1942–43, Professor H. E. Butler retired from the Chair of Latin, which he had occupied since 1911. Following a predecessor whose name was held in peculiar veneration, A. E. Housman, he has not only upheld the high traditions of the Classical school of the College, but by his scholarly influence has added the impress of his own personality to those traditions. As doyen of the Professorial Board, his mature judgment has been highly valued, more especially when he has been called upon to preside over its deliberations. His relations with the University have also been of great service to the College. He represented the College at University meetings during the absence of the Provost, Sir Gregory Foster, in 1925. He took an active interest in the initial stages of the scheme for the co-operation of the University with the London Training Colleges, under which University College is associated with a group of four Training Colleges for men. As Chairman of the Group Committee, he took great pains to aid the smooth working of the scheme, and the success which has attended it owes much to him. The College Committee further remember with gratitude his ready help at a difficult time when he consented to undertake the duties of Pro-Provost at Aberystwyth, although he had no particular liking for administration. While he has preferred to go his own way in his daily academic life at Gower Street, the atmosphere of the staff Smoking Room has been congenial to him, and his presence there has always had a stimulating influence. He will be greatly missed when his colleagues are once more able to forgather in a reunited College.

The College Committee, at their meeting on 20th July, 1943, associated themselves with the following resolution of the Professorial Board :—

> That the Professorial Board, placing on record its sense of loss upon the retirement of Professor Harold Edgeworth Butler from the Chair of Latin, which he has held with great distinction for thirty-two years, bids an affectionate farewell not only to the Senior Professor of the College, but also to a colleague who was the friend of all, who gave greatly of himself and sought nothing for himself.

His outstanding place in the life of the College may be realised when we recall that, as far back as 1925, during the year of Sir Gregory Foster's absence, it was Butler who presided in his place over the Professorial Board. He has been a man of note in the counsels of the University, for long a member of the Senate and Public Orator. A Latinist of the highest reputation, his other interests were wide indeed, his reading immense, and all his treasure lay open to his colleagues and adorned the College which he loved and served so well. He will be missed not least when the good days return and when Professors dine together once more, with surviving wine of Butler's choosing.

The Professorial Board offers greetings to a friend and colleague and wishes long years of happy activity in retirement to him and to Mrs. Butler.

Professor E. J. Salisbury resigned at the end of last session, on his appointment, in succession to the late Sir Arthur Hill, as Director of the Royal Botanic Gardens, Kew. While welcoming the honour conferred by such an appointment, not only on the Professor himself but also on his College, it cannot but be a matter of keenest regret to his colleagues and to the many students who have worked under his guidance that his invigorating presence will no longer be in the Department of Botany when the College reassembles in London. His connection with it goes back to his early boyhood as a pupil of University College School, which then occupied part of the College premises. After a brilliant student career, culminating in his election to the Quain Studentship in Biology, he was absent for a brief period of three or four years, during which time he was Senior Lecturer at East London [now Queen Mary] College. He returned to Gower Street with a special wartime appointment in 1917 and took his place on the permanent staff as Lecturer in 1919. In the following year his connection with the College was further cemented by his election to the Fellowship. In 1923 the Senate conferred on him the title of Reader in Ecology. On the retirement of Professor F. W. Oliver from the Quain Chair of Botany in 1929, his duties were divided between Dr. T. G. Hill, who became Head of the department, with the title of Professor of Plant Physiology, and Dr. Salisbury, who succeeded to the Quain Chair, an arrangement which has worked most harmoniously. Professor Salisbury has taken his full share in the academic and social life of the community, and the College Committee are glad to think that his daily life at the College has been so congenial to him that the regret at its discontinuance is by no means one-sided. They wish him a happy and successful tenure of the important office which he now fills and hope that its duties will not be too onerous to permit him

to revisit the scene of his earlier career at not too infrequent intervals. He will always receive there the warmest of welcomes.

Another gap in the professorial ranks has been created by the appointment of Professor R. A. Fisher to the Arthur Balfour Chair of Genetics at Cambridge and his consequent resignation, at the end of 1942–43, from the Galton Chair of Eugenics. He came to the College in 1933 as successor to Karl Pearson, the first Galton Professor, entering into the heritage of a pioneer department with a unique reputation which, by the workers it had attracted and its valuable publications, had acquired world-wide fame and had contributed work of great national importance. Professor Fisher has brought his own contribution to its fame, and by his single-minded devotion to its interests and his intellectual vigour has carried the work from strength to strength, despite the regrettable hindrances which have been occasioned by War conditions during recent years. His position in the scientific world has added lustre to the professoriate. He carries with him into his new sphere of activity the good wishes of the College Committee and of his colleagues and students.

The College has lost yet another of its professors to Cambridge by the appointment of Professor W. B. R. King to the Woodwardian Chair of Geology. It is for him a return to familiar surroundings, for, prior to his joining the College in 1931 as successor to Professor E. J. Garwood in the Yates-Goldsmid Chair, he had worked for eleven years as Assistant in the department of which he is now called to be the Head. He leaves behind him at Gower Street the happiest memories. While confining his energies mainly to the interests of his department, he has been a good citizen of the College as a whole, always showing a readiness to help forward its general welfare. He had recently consented to become one of the trustees of the Union Society's new athletic ground, and it is a matter of particular regret to those concerned with this enterprise that his help will no longer be available when the time comes for entering into occupation and putting into operation the development of an Athletic Centre planned on a more ambitious scale than anything that has been possible in the past. A distinguished military career has withdrawn Professor King from College activities since the outbreak of War, but it had been hoped that he would have returned to see his department eventually moved into the new premises planned for it as part of the general rebuilding scheme, a task which will now have to devolve on his successor. He carries with him to Cambridge the affectionate goodwill of his many University College friends, who hope to see him often among them in the years to come.

Following on retirements noted in the last Report, it is pleasant to record that the Senate have conferred the title of Professor Emeritus on Dr. Norman Baynes and Dr. Charles Singer.

The honour of knighthood which has been conferred by His Majesty the King on Professor J. C. Drummond, at present Scientific Adviser to the Ministry of Food, is a matter of much gratification to his friends at the College.

Dr. J. C. Flugel, of the Department of Psychology, resigned at the end of 1942–43. He had been a member of the staff since 1909, when he first joined it as Demonstrator, becoming later Senior Lecturer and, in 1929, Assistant Professor. He followed the department into evacuation at Aberystwyth, but other claims have now obliged him to withdraw. His long connection with it has been a great stimulus to the promotion of psychological studies at the College, and the position which he holds personally in that branch of learning, by reason of his researches and writings, has contributed in no small measure to the fame of the department.

Dr. E. D. Hughes, an active and valued Lecturer in the Department of Chemistry, also resigned at the close of last session, to take up an appointment as Professor of Chemistry at the University College of North Wales, Bangor.

The title of Reader in American History has been conferred on Dr. R. A. Humphreys, formerly Lecturer, in recognition of his distinguished work in that subject, more especially in relation to Latin-America.

The Professorial Board.—Leatherhead has continued to afford week-end hospitality for vacation gatherings of members of the Professorial Board and other academic committees. These opportunities of meeting in such pleasant and friendly surroundings still prove very popular and are of the greatest assistance in promoting discussions, both formal and informal, of the many acute problems which concern the College as a whole at the present time. Three such gatherings have been held during the past twelve months.

Dr. O. L. Brady, Reader in Organic Chemistry, has been appointed a member of the Board under Statute 24 (4). Dr. R. C. Brown and Dr. J. F. Lockwood have succeeded Dr. Ogilvie Buchanan and Dr. A. H. Smith as two of the six representatives of the non-professorial staff, as the result of an election by post, held for the first time under a new Emergency Regulation adopted by the Senate. Under an Emergency Statute similarly adopted, Dr. Una Fielding has been appointed a member so long as she continues to act as Head of the Department of Anatomy.

GENERAL FINANCE.

Financial Year 1942–43.

The Accounts for the year ended July 31st, 1943, are appended to this Report (Appendix I.).

College Establishment Income and Expenditure Account.

Income.—The ordinary income decreased by £1,123 1*s.* 8*d.*, from £162,772 10*s.* 10*d.* to £161,649 9*s.* 2*d.* The main causes were a decrease of £1,268 in the amount appropriated from Endowments (Trust Funds) and a decrease of £230 in the amount appropriated from Donations and Subscriptions, owing to decreased expenditure. On the other hand, there was an increase of £342 under the head of Other Income.

Expenditure. — The ordinary expenditure decreased by £13,470 19*s.* 9*d.*, from £148,241 9*s.* 3*d.* to £134,770 9*s.* 6*d.* There have been further savings due to the release of members of the academic, administrative and servant staffs for National Service and reductions under the head of Maintenance of Premises.

The excess of ordinary income over ordinary expenditure was thus £26,878 19*s.* 8*d.*, which, together with the sum of £1,000 5*s.* 2*d.* received in respect of the temporary occupation of College buildings, was sufficient to meet the cost of evacuation, accommodation in other Colleges, and War Damage Insurance, in addition to the other extraordinary expenditure, leaving a surplus of £7,989 16*s.* 4*d.* This surplus, together with the available surplus income of Trust Funds appropriated under the Emergency Statute, was allocated as follows :—£21,200 to General Reserve Fund, £474 19*s.* 9*d.* to General Library Reserve Fund, and a final surplus in respect of 1942–43 of £31 1*s.* 6*d.* carried forward.

BENEFACTIONS AND DONATIONS.

The College Committee make grateful acknowledgment of the Grants, Subscriptions and Donations received from the bodies and persons named in Appendix II. (pages 50–51).

They also desire to record their thanks for the following further gifts received during the past twelve months :—

(i.) *Gifts to the Library.*

Miss N. Beale, Sub-Librarian of the College.

65 volumes, chiefly English and French literature.

Miss Gertrude Chambers.

A collection of volumes and pamphlets from the Library of her brother, the late Professor R. W. Chambers, given in accordance with the wish expressed in his Will.

The late Miss E. Jeffries Davis, Fellow of the College.

28 volumes and pamphlets, chiefly concerned with the History of the College.

The Delegates of the Cambridge University Press.

75 volumes published by the Press ; to replace losses due to enemy action.

Mr. J. G. Fernie, through Mr. J. D. Cowley.

85 volumes and pamphlets, chiefly History and General Science.

Mr. T. J. Garstang.

Some 300 mathematical books and pamphlets, in memory of his late son, T. E. Garstang, a member of the College from 1926–1932.

Miss Joan Gladstone, a former student.

21 volumes of English literature.

Dr. G. P. Gooch, through the National Central Library.

112 volumes, mainly European history.

Mr. T. Knox-Shaw.

543 volumes and pamphlets of Classical literature, largely periodicals, from the Library of the late Dr. E. Harrison, Registrary of the University of Cambridge.

The late Sir Henry Miers, by bequest.

140 volumes and pamphlets, Archæology.

Mr. R. W. Paul, through the good offices of Professor F. E. Weiss, Fellow of the College.

76 volumes, General Science.

Mr. E. E. Perrin, a former student.

40 volumes, History of Science.

The Provost.

39 volumes for the Science Library.

Public Salvage Drive, through the kindness of Mr. C. B. Oldman, Assistant Keeper of the Department of Printed Books in the British Museum.

295 volumes, chiefly English history, literature and biography, including a " Breeches " Bible, 1599.

Mr. E. Pyddoke.

35 volumes and pamphlets, chiefly Archæology.

The Misses Russell, through the good offices of Professor Richardson.

A large collection of autograph letters, formerly at Ampthill Park, consisting of letters from scientists, *e. g.* Agassiz, Bernhardi, *etc.*

Miss F. M. Selby.

84 volumes of scientific interest, from the Library of her father, the late Mr. F. J. Selby, a former student of the College.

Sheringham Salvage Committee.

21 volumes, including three early printed books.

Society of Chemical Industry.

221 volumes of scientific interest.

The Lord Stanmore, through the good offices of Professor Richardson.

A large collection of between 800 and 900 architectural photographs, chiefly French.

Mr. A. P. Trotter, through the good offices of Professor R. O. Kapp and Professor J. T. MacGregor-Morris.

A set of "The Electrician," Volumes 2–70, 75, 80–85, 1878–1920.

University of Glasgow.

50 volumes, mainly Classical Archæology.

Professor Basil Williams, through the National Central Library.

26 volumes, for the History Library.

(ii.) *Other Gifts.*

Under the Will of the late Sir Ernest Moir, Bt., Fellow of the College and a member of the College Committee from 1918 till the time of his death in June 1933, a bequest amounting to some £18,000 has been received for the Department of Engineering. A committee has been appointed by the Professorial Board to advise as to the purposes to which this benefaction should be devoted.

In addition to the Library gift received under the Will of the late Sir Henry Miers, Principal of the University from 1908 to 1915, recorded above, the testator also bequeathed his valuable collection of photographs of ancient sculpture for the Department of Archæology of the College.

ADMINISTRATION.

The College Committee have been deeply concerned at the serious illness of the Provost, which has recently necessitated a prolonged stay at University College Hospital. They are glad to report that he is now making an excellent recovery and is already showing a desire to resume some of his administrative duties, though advised that his convalescence must not be unduly hastened.

Meantime, the Secretary has been carrying on the main administration with his staff at Stanstead Bury. In order to give tangible expression to the committee's high appreciation of Mr. Tanner's constant readiness to shoulder extra burdens and his signal services at all times, but especially during the difficult period between the sudden death of Sir Allen Mawer and the appointment of his successor as Provost, a gift of plate was presented to him by the Chairman, on behalf of the College Committee, on the occasion of their meeting on 20th July, 1943. The committee hope that Mr. and Mrs. Tanner will long be spared to enjoy the use of it.

THE COLLEGE BUILDINGS.

Friends of the College are naturally anxious to know the prospects of its return to London, and many enquiries have been made. It is, perhaps, premature to make a definite statement on the matter, in view of the great amount of preparation which will be necessary before even temporary accommodation can be provided for a restricted number of staff and students. The College Committee have, however, expressed the desire that the major part of the work of the Faculties of Arts and Science should reopen in London in the Autumn of 1944, if at all possible. The question of the return of the other Faculties and Departments is still being explored. Any decision is necessarily governed by circumstances, and must, at this early stage of the year, be subject to over-riding conditions which may eventuate between now and next October. Meantime, plans and preparations are going forward as far as practicable, while the habitable portion of the buildings is continuing to house certain branches of National work as well as the University Appointments Board, the Lodgings Bureau, the School of Slavonic Studies and the Universities Bureau of the British Empire, all of which had been rendered homeless.

PUBLIC LECTURES.

The scheme of Public Lunch-Hour Lectures at the College, the inception of which was mentioned in the last Report, has now been fully launched under the direction of Professor John Macmurray, and is meeting with a gratifying response on the part of the general public. Two weekly lectures are arranged during term-time on

Tuesdays and Thursdays from 1.15 to 2 P.M. in the Anatomy Theatre. There is a complete lack of formality regarding admission, for no fee or ticket is required. The attendance has rarely been less than 100, and on occasions it has been more than double that figure, and considerably in excess of the seating capacity of the theatre. A body of staunch and enthusiastic supporters attend regularly, and there is ample evidence that the lectures are warmly welcomed by the workers of London, more especially in the College neighbourhood, for whom they are intended. Note-taking is a particularly interesting feature, showing that many attend not as a mere pastime but as a means of education. The College Committee desire to take this opportunity of expressing their appreciation of the efforts of Professor Macmurray and those whose co-operation he has enlisted to enable the College in this way to make its contribution to the cultural amenities of wartime London.

The following list of lecturers and subjects shows the wide field which has been covered during the period under review :—

Visitors :—Mr. H. L. Beales, "The Freedom of the Press" (Richard Carlile Centenary); Dr. J. Bodmer, "The Central European Chessboard"; Mr. H. N. Brailsford, "The Future of Germany"; Sir Fred Clarke, "Reconstruction in Education"; Mr. G. D. H. Cole, "The Beveridge Report"; Dr. Hugh Crichton-Miller, "Patriotism, Compulsion and the Ego"; Miss S. Margery Fry, "The next Ten Years in Penal Reform"; Mr. Ronald Gould, President of the National Union of Teachers, "The Meaning of the New Education Policy"; Dr. J. A. Hadfield, "The Social Possibilities of Psychological Medicine"; The Rev. Professor Josef Hromádka, "Russia and Europe"; Dr. R. Jacques, "The Place of Music in the Future"; Mr. Philip James, "Art in War and Peace"; Mr. W. M. Macmillan, "The real Colonial Question"; Dr. Karl Mannheim, "The Remaking of Human Behaviour"; Mr. George Nemes, "The Modern Dwelling-House"; Mr. Arthur Newall, "Changing America"; Sir Frederick W. Ogilvie, "The Prospects of Post-War Trade"; The Rev. Dr. James Parkes, "The Jewish Problem after the War"; Mr. J. B. Priestley, "The Future of the Communal Arts"; Dr. Herbert Read, "The Social Basis of Art in a Machine Age"; Professor H. V. Routh, "Basic English and Post-War Culture"; Dr. Edith Summerskill, M.P., "Women after the War"; Mr. Leonard Woolf, "International Democracy"; Dr. George K. C. Yeh, "The Chinese People and their Culture"; Dr. N. Zernov, "The Christian East and the Christian West".

Members of the College :—Professor E. N. da C. Andrade, "Science and Culture"; Dr. G. B. Brown, "Modern Science: its Method and Philosophy"; Dr. A. Cobban, "The Future of Politics"; Professor Sir J. C. Drummond, "Nutrition and the Hot Springs

Conference "; Dr. J. C. Flugel, "Psychological Conditions of Enduring Peace"; Professor Daniel Jones, "Phonetics as an Aid to International Communication"; Professor R. O. Kapp, "Engineering and Democracy"; Professor G. W. Keeton, (i.) "China and the Future", (ii.) "The Problem of Japan"; Dr. S. V. Keeling, "The Philosophy of the French Tradition"; Dr. G. J. Renier, (i.) "Dutch National Consciousness", (ii.) "Holland under French Occupation, 1795–1813"; Dr. P. N. Rosenstein-Rodan, (i.) "The Problem of Eastern Europe", (ii.) "Can Austria be Independent?"; Dr. G. Schwarzenberger, "World Anarchy or World Order?"; Professor C. J. Sisson, "Poetry in the Planned State"; Professor D. M. S. Watson, "The Importance of the Individual".

In addition, Professor Macmurray has himself delivered a course of Six Lectures on "The Form of the Personal", and some eight separate lectures on various philosophical aspects of current problems.

Public Lectures have also been given in connection with the Department of Phonetics, dealing with various aspects of the language problem, by Professor Daniel Jones, Dr. Harold E. Palmer and Mr. N. C. Scott.

PRO PATRIA.

The following further lists concerning past and present students of the College on War Service have been compiled from College records since the issue of the last Report. The Committee realise that these are probably incomplete owing to lack of information. Any such information which relatives or friends are able to supply will be gratefully received. It should be sent to the Secretary at the London address.

THE ROLL OF HONOUR.

Alexander, P. J. (Arts 1941–42.)
Killed in action in Sicily, 1st August, 1943.

Anderson, P. T. (Medical Sciences 1932–33.)
Flying Officer, R.A.F.V.R.—Missing, presumed dead, April 1941.

Batra, K. R. (Medical Sciences 1908–13.)
Lieut.-Col., I.M.S.—Died on active service, 5th March, 1942.

Bhaduri, D. N. (Engineering 1937–41.)
Electrocuted while engaged in research work of National importance, 6th October, 1943.

Bruhn, C. J. (Medical Sciences 1934–37.)
Lieut., Free Danish Forces.—Presumed killed on special mission, 1943.

Drew, S. A. R. (Laws 1937-38.)
Lieut., 2nd B.E.F., 1940.—Wounded and taken prisoner at St. Valéry, 1940; afterwards died of wounds.

Edden, N. H. (Arts 1937–39.)
Lieut., Royal West Kent Regt.—Killed in Libya, 1942.

OBITUARY.

The Rt. Hon. Lord Meston of Agra and Dunottar, K.C.S.I., LL.D.,

Vice-Chairman of the College Committee.

The death of Lord Meston on 7th October, 1943, has brought a sense of great personal loss to the College.

Lord Meston joined the College Committee in 1922 and became its Vice-Chairman ten years later. His distinguished career as an Imperial administrator, his outstanding position in the academic world, his financial insight, his statesmanship, his wide experience of men and affairs, his natural courtesy and kindliness, all these great qualities combined to make for him a place peculiarly his own in the esteem of his fellow-members. From the time of his first connection with the College he became its friend, ready to serve its interests in any way in his power. Of the numerous instances of his practical help, the one most widely associated with his name is the Chairmanship of the Centenary Fund, inaugurated in 1925 and closed in 1930. During those five years a sum of over £225,000 had been raised, and probably no one appreciated better than Lord Meston himself the amount of effort which had to be expended in order to achieve this result. The success of the appeal was due in large measure to his influential assistance.

When the Honorary Fellowship of the College was instituted by the Senate in 1928, Lord Meston was among the small body of men to be first elected, such election carrying with it a recognition of great services rendered to the College and University.

He represented the College on the Senate from 1935 until the time of his death.

It had been a matter of great regret in recent years that Lord Meston's ill-health had prevented him from taking as active a part as formerly in the affairs of the College Committee. Not many months before his death he had expressed the hope that he would be able to resume more active work, a hope that was not destined to be fulfilled. The College is the poorer for his passing, but will long cherish memories of one who befriended it in times of difficulty and to whom it pays grateful tribute.

Miss Eliza Jeffries Davis, M.A., F.S.A.

In the Report of 1941 a tribute was paid to Miss E. Jeffries Davis on the occasion of her retirement from the Readership in the History and Records of London. Unhappily, it now falls to the lot of the College Committee to record her death, on 30th October, 1943, and, in doing so, to recall her long period of unique service to the College and the University, and to the great city which constitutes their immediate sphere of activity.

Miss Jeffries Davis joined the Department of History as a Research Assistant in 1914, having already gained considerable experience as a school teacher and training college lecturer. In 1919 she became Lecturer in the Sources of English History, but her real life's work was more intimately associated with London and its history, a field in which she made her greatest contribution to learning. In 1921 she was granted the title of Reader, the first in that subject, and began to build up a strong sub-department whose fame spread not only among serious students but also among members of the general London public, who attended her public lectures and sought her advice. The fine sectional Library, with its valuable collection of maps, which she built up will remain her visible memorial in the College.

In view of her scholarship and her signal services, she was elected to the Fellowship of the College in 1926.

The genius of Miss Jeffries Davis lay in the infinite capacity for taking pains which is so often allied to the keen research mind, and her single-minded devotion to her subject. No task was too tedious for her to undertake in its interests, and there are countless instances of the sacrifice of her time and energies in order to spread the knowledge she possessed. Among these may be mentioned the great trouble she took to deal fully with enquiries, her readiness to arrange exhibits of her maps and books, her Saturday afternoon conducted tours of the City for small parties of colleagues and friends, and the delivery of her public lectures in duplicate, so that she might reach both afternoon and evening audiences. An enthusiasm such as hers necessarily had a contagious influence, and there are many who will continue to miss the inspiration of her help.

She was not so entirely absorbed in her researches and writings that she failed to play her part as a good citizen of the College and University. Others have told of her ungrudging service to the Institute of Historical Research, both at the time of its foundation under Professor Pollard and in recent years, and of her twelve years as editor of the journal "History". The Evening School of History of the College was a further outlet for her energy. The College Committee also remembers with gratitude how, with characteristic unselfishness, she voluntarily carried on the work of Publications Secretary during the Great War of 1914–18.

She leaves behind her a memory of one who, entirely devoid of self-seeking, found her greatest satisfaction in service and scholarship, and who seized the cup of Knowledge eagerly with both hands.

Dr. Henry Forster Morley, M.A., D.Sc., F.I.C.

Dr. Henry Forster Morley, whose death occurred on 3rd April, 1943, was an outstanding figure amongst the scientific *alumni* of the College, whose connection went far back in its history. He was a pupil of University College School, then accommodated on the College premises, and entered as a College student in 1872. After a brilliant student career, which extended over five years, he was elected a Fellow of the College in 1878. In 1883, the year in which he took his doctorate, he became a member of the teaching staff of the Department of Chemistry, first as Lecturer, later as Assistant Professor, a position which he retained until 1887. From that time onwards his career took him away from the College.

He was one of the founder-members of the Chemical and Physical Society of the College and its third president. When the sixtieth anniversary of the Society was celebrated in 1935, it was he who was invited to unveil the panels bearing the names of former presidents which were placed in the Chemistry Theatre. This unveiling was arranged to be done electrically, and the engraved silver switch was afterwards presented to Dr. Forster Morley.

He was a past-president of the Old Students' Association.

Dr. Forster Morley never lost his interest in College affairs, although the most important part of his life's work, which included the Directorship of the International Catalogue of Scientific Literature and the Joint-Editorship of Watts' *Dictionary of Chemistry*, was not done within its walls. His presence at College gatherings was always warmly welcomed.

The College Committee also record with regret the death of the following persons who were connected with the College :—

Aitken, Mrs. Georgiana B. ; entered as a student in 1904 ; retained a long connection with the Department of Egyptology and with the Old Students' Association. [25th April, 1943.]

Battye, Lt.-Col. Walter Rothney, D.S.O., formerly Medical Superintendent, King George V. Merchant Seamen's Memorial Hospital, Malta ; Student of the Faculty of Medicine, 1892–98. [27th April, 1943.]
